

Citi'Board enables you to **access to all your operational data**. In this integrated BI module, information is displayed through dynamic dashboards.

Fleet Management

- Dynamic display of data related to **fleet management** (vehicles' use rates, mileages, travel times, activity sensors...)
- **Management of operational cost**

Operations Management

- **Quality of service** for each round and team
- **Safety tracking** via hazards and events statistics
- **View of Collected waste weights** by geographical areas

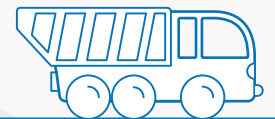

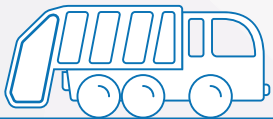

Performance analysis

- **Operational vision** of the used resources to ensure quality of service
- Decision support in the **sizing of human and material resources**

CITI'BOARD : A simple tool to follow the evolution of waste collection key indicators

Simplified User Experience

Direct access from Geored with a simple and clear display

Visualization from data

Graphical presentations and simplified **data management**

Highlight on your performance evolution

Visualization and **comparison of** activity **data** with monthly and annual filters

User time saving

Saving time in making decisions and managing operations through the **automatic update** of reports and dashboards
