

# Upgrade to a complete collection management solution!

Simplify your collection management by adopting a single solution that meets the needs of geolocation, guidance and **RFID bin identification!**

With Citi'ID, the driver has just one on-board screen in the cab, which **he can** use to **monitor the lifting of the bins** while benefiting from navigation assistance. All the **data is uploaded in real time to** a single software solution for management.

**Transferring the collections** to our platform and exporting the data to the billing software

**Ease of operation** with an in-cab view of the collection status of each identified bin

**Geolocation** of vehicles and container collections

**Import ban lists** and control the container lift to enable blocking

Real-time **monitoring of** collection operations

Reports on the **quality** of your services

# The uniqueness and scalability of the solution

## Benefits identified

### Offer scalability

- The technical offering meets the challenges of both bin identification and vehicle geolocation.
- The **geolocation** module **can be activated** remotely in just a few clicks, with **no technical constraints**.

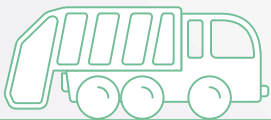

### Cost savings

- A **single calculator** can be used to identify the bins and geolocate the vehicles.
- Identification and geolocation data are centralised in a **single interface**.

### Flexibility of the tool

- The parameters and behaviour of the container lift can be set per circuit and per vehicle.
- Simplificiti can configure and update the on-board software at your **convenience**.
