

Citi'PAP is the complete solution dedicated to the intelligent management of your household waste collection activities. The Geored web solution is the tool that enables your **operator to monitor and communicate in real-time with their teams in the field.**

Support your operational teams, drivers and refuse collectors remotely. The driver in the cabin benefits from **track guidance**, allowing them to complete their tour in complete safety.

Track your collection **operations** in real time

Navigate in comfort with navigation assistance

Automatically check the quality of your services

Access your vehicle **history**

Create and plan your cleaning routes

Receive reports on the **quality of your services**

The uniqueness and scalability of the solution

Benefits identified

Offer scalability

- The tablet and box can be used as part of an **upgrade to the incentive tax** with our Citi'ID solution.

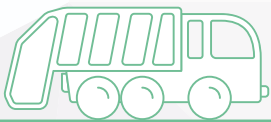

Activity management

- Business data is continuously fed back **in real time** to monitor operating resources, aiming for **continuous improvement**.

Flexibility of the tool

- A range of modules can be added as **your operating requirements evolve**.

A tried and tested solution
