

Geored is our operating solution for **optimising** and **managing** waste collection and cleaning activities.

Interfaced in real time with dedicated on-board business systems, our operating tool enables simple, high-performance management of services.

Supervise your teams remotely and check the progress of their assignments

Track your **vehicle fleet** and their real-time progress

Create your reference **circuits** and then compare the theoretical circuits with the real ones

View field **anomalies** reported by operational teams

Access your vehicle **history** by date, route or driver

Monitor your business via available activity and operating **reports**

Discover the latest developments in Geored V3!

A tried and tested solution

24M

inhabitants covered

4 500

equipped vehicles

100M

km travelled per year

2M

tours per year

More than 1,600 customer users

15M€

invested in the solution since 2007

Innovations to enhance the user experience!

We're developing a new user interface that's more ergonomic, responsive and fast, so you can work more simply and efficiently!

Overhaul of the database

Enhanced cartography

Simplified search
